

**Draft Approach
Long Range Transit Plan**

- Develop a transportation network for the Chapel Hill-Carrboro area that includes roadways, public transit, bicycle and pedestrian facilities. The development of the transportation network will include an assessment of the fiscal and land use impacts of the implementation of the transportation facilities.
- Develop estimates of the person trip capacity of the transportation corridors within the Chapel Hill-Carrboro area.
- Prepare land use plans for future development and redevelopment consistent with the capacity of the transportation network. Prepare an implementation plan for transportation improvements and land use development.
