To: Kumar Nappalli, EIT

Thanks for meeting with me last week, and hearing about my traffic & driveway problems.

My house is located on McLawley ST (227) between Pittsboro and Ransom streets. The street is very heavily traveled, and the parking much in demand.

At least 8-10 times per year I must call 911 because a car is parked over my driveway. Usually, an hour has elapsed after the Chapel Hill police arrive and the tow truck makes its appearance. Of course the town must recover the cost from the driver/owner of the offending car.

2

In the past we have
painted the driveway and adjacent
gutters bright yellow, and placed
reflectors on the trees. This
does not always work, especially
at night. Now that we have
new curbs we will have to
consider renewing it again.

In addition, we seem to be
the unloved stepchild of our
neighborhood association. None
of the owners or tenants on
my block have received notices
of meetings for several years.
I discovered the additional
residential parking hours
passed by the council only by
accident.

We do have residential parking
only until 12 P.M. Then it becomes
public and a free-for-all. Just
ask the parking police!

I am requesting the identical changes for McCauley as is now enjoyed by Vance^{ST.} and West University drives. (Res. only from 9-7PM) I don't think the 300 block of McCauley has anywhere near the volume of traffic as we do.

A DO NOT PARK OVER DRIVeway sign would be much appreciated, and very helpful, especially at night.

Thanks for your consideration of my request.
