Subject: N. Lakeshore

Dear Mr. Horton,

I recently talked with Mr. Kumar and Mr. Taylor, in the engineering department, about the traffic problem on N. Lakshore Dr.. My hope was to implement some form of speed control (my idea was stop signs at all intersections as on Elliott) on the road while the bridge was closed for construction. Thus, car and truck drivers would be greeted with this change along with the new bridge.

Mr. Kumar told me I should write you with a formal request for a for a study, which the city would undertake, to evaluate traffic and speeding after the bridge work is complete. This is my request. I would also like to request that we save the town some money and rely on the results of a previous study that resulted in the installation of the controversial speedbumps. I didn't live here then but I heard about the nightmare. We all know that there is more traffic on N. Lakshore than existed then and people drive fast.

A number of families with young children have moved into the neighborhoods around N. Lakshore in the 3 years that my family and I have lived here. I am really afraid that we are going to have a tragic accident if nothing is done to prevent speeding on the road. As someone from engineering pointed out to me, the road is wide and just invites you to go fast.

I know several people in the neighborhood support this change. Please let me know if there is anything I can do to see it happen.

Thank you so much for your help and for all you do for our town. I look forward to hearing from you.

Sincerely,

Rody Spivey
