 Subject: Greenbridge Project

Dear Mr. Mayor and Council Members:

Coolie and I respectfully urge approval of the Greenbridge project at your meeting on February 26. We view this as an opportunity for our community to put into action our belief that the central issue facing our society is carbon emission and related global warming. This is the first project of its sort in the state and will garner favorable publicity including national mention. We can seize a role of leadership as we move toward a new standard represented by this project.

Greenbridge has the support of its neighbors, including religious leaders, business people, and community activists. The design is by an acclaimed architect with a national and international reputation. In our more than 50 years here, we have commonly been opposed to change. Our conviction now is that this is a new day presenting new challenges demanding new approaches. Finally, it is notable that the developers are people, who live among us and have demonstrated their concern for this community in numerous other ways. They bring to this a manifest concern for our environment and commitment to make a difference.

Again, we urge your approval.

Respectfully,
 Thad Monroe

Mayor Foy and Council Members:

I support what the Greenbridge developers are trying to do downtown but the project is too tall. I could live with 6 stories and other citizens I've talked with feel the same way. We cannot accept their position that a smaller building would not be economically viable. In fact, the upper floors are the most expensive to build in any building. I was pleased to hear the questions you asked at the public hearing. It shows you are very concerned with the impact this project will have on Northside, Downtown and the Town. Thanks for your hard work and commitment.
