Subject: Northwest Chapel Hill Development and Eubanks Road

Dear Mayor Foy and Council Members,

As part of your discussion tomorrow, could some attention be paid to the character of Eubanks Road? Currently, Eubanks Road and the immediate area are being heavily impacted by governmental development. A number of these projects have been deferred until the last minute, placing a lot of stress on the governmental body(ies) to deliver. The government(s) are also in control of the development process. This dynamic has caused a number of residents of Eubanks Road to view the governmental activities with resignation.

As regards to a Waste Transfer Station on Eubanks Road, I am concerned about the potential health risks posed by having essentially a mobile landfill going past my door every day. Given that there are two potential schools sites nearby, one directly across me on Eubanks Road I would ask that you, as potential neighbors, allocate the expertise and resources to investigate the issue and determine the health risks to myself and your school children.

Thank you,
Frank Corr
