Mr. Gene Povoromo  
Town of Chapel Hill  
Planning Department  
306 North Columbia Street  
Chapel Hill, N.C. 27516

**RE: Campus at Vilcom Center  
Chapel Hill, North Carolina  
CDA-9800**

We have determined we can provide service to the proposed building under the following conditions:

1. The applicant must coordinate their construction schedule to allow timely installation and orderly placement of all utilities.
2. In respect to the limited construction area provided by this design for public utilities, liability for damages to trees, walks, streets or curbs incidental to the installation of facilities, will not be accepted by Duke Power Company.
3. Repair expenses for incidental damages to water, sewer or drain lines not clearly and accurately located with paint or other markers, will not be accepted by Duke Power Company.
4. Project completion may require reimbursement for extraordinary construction efforts due to installation difficulty in the limited construction area provided, and for placement of conduit when facilities will be beneath walks, streets or curbs.

We are not aware of any unresolved conflicts between the proposed improvements and our existing lines or equipment in the area.

Sincerely,

J Steven Small
