

We would like to petition the staff to research different funding scenarios for the operational costs of the Chapel Hill Public Library that would involve a fee for use for non-residents of Chapel Hill, i.e. library card fees, if the council elects to not accept the current or proposed level of annual Orange County funding.

We would also like the staff to research fees charged by other NC municipalities for their non-residents, if those municipalities are responsible for all or a significant portion of their Library's operational funding. Such information could be useful to the Town Council during the budget season as we deliberate the future expansion and operational funding inequities of our Library.
