## ATTACHMENT 1

The following Business owners and representatives wish to make the town Council aware of our support for the expeditious approval of the modified Special Use Permit, the issuance of a Zoning Compliance Permit and the speedy completion of the movie theatre project in the Village Plaza for the following reasons:

The plan was originally approved and the operators of the theatre are entitled to proceed.

A quality local theatre in the immediate Chapel Hill area will reduce the amount of spending migration to the big mall. That's good for all local businesses.

The present condition of the site is an eyesore and creates a significant access problem for customers of existing retail and service establishments.

The current lack of traffic patterns markings and signage around the site is dangerous and impedes mobility.

Major capital improvements to the Northeast end of the Village Plaza parking lot are stalled due to the delay in this project.

Delaying this important project serves no one's interests and hurts all of the merchants along Elliott Road.

There's enough room for the theatre and every other retailer in the area to do business. Let's accommodate, compromise, mediate, or whatever it takes to get this project done. Please.

Thank you for reading this.

Respectfully submitted.
