**Subject:** Traffic signal at Intersection of Meadowmont Lane with Sprunt Street and Cedar Club Circle

This is a status report on factors related to the subject Traffic Signal.

First: 252, or 84% of the units, are completed. An additional 36 units are under construction and scheduled for completion in April, 2006.

Second: We accept your recommendation that we provide funding for the light. We currently have \$47,500 available and will continue to receive additional sums over next month. We anticipate that we will have \$50,000 available when construction begins.

Third: Given that the Traffic Analysis conducted in April 2005 has cited a number of issues that warrant the installation, we respectfully request approval of the installation upon our providing a \$ 50,000 contribution to the project.
