

④

Need a traffic light at intersection of New Stateside Road and Airport Road

South Estes Drive Community

The canal or creek needs to be excavated deeper and a fence should be placed to run parallel with the neighborhood and the UNC soccer field

The traffic light needs to be re-patterned to allow proper flow of traffic from So. Estes Drive and Fordham Blvd

5

Petition for Traffic Changes
At Intersection of
15/501 and S.Estes Drive

1. On the 15/501 South lane, place a STOP HERE sign.
2. The signal light for S.Estes Drive (East) into the community and onto 15-501 North, turn left traffic light signal needs a delay timer. (40 seconds) This will allow traffic to have its right of way and pedestrians to start walking across the 15-501 intersection.
3. On 15-501 North before the S.Estes Drive intersection, a fluorescent WATCH FOR PEDESTRIANS sign.

This is a major intersection in Chapel Hill with high traffic volume, because of the University Mall shopping area, and it is the only exit for the S.Estes Drive community residents.

Many accidents have occurred at this intersection. Please consider our suggestions for all who use this intersection.
