Archived Sites

The Archive database contains information on sites which have been removed and archived from the inventory of Superfund sites. Archive status indicates that to the best of the EPA's knowledge, Superfund has completed its assessment of a site and has determined that no further steps will be taken to list that site on the NPL.

Select a state in which the archived site you are searching for is located or order a **Customized Report** for a specific site or search across the Archive database.

Disclaimer
