

OAKS I HOMEOWNERS' ASSOCIATION
1114 Burning Tree Drive
Chapel Hill, NC 27515

24 March 2003

Dear Mr. Horton:

Enclosed is a petition from concerned homeowners in our association. The petition has been reviewed and endorsed by the Association Board and is forwarded for consideration by the Town Council.

The potential danger to these residents and to children who reside in the Oaks condominiums is real. The recently installed speed humps have alleviated excess traffic speed along most of Burning Tree Drive; however, the area specified in the petition still suffers from excess speed.

Your assistance in this matter is appreciated.

Louis V. Hightower

President, OAKS I Homeowners' Association

The Town of Chapel Hill
The Town Council
C/O Mayer Kevin Foy
306 North Columbia Street
Chapel Hill, NC 27516

Dear Town Council:

We, the residents of the eastend of Burning Tree Dr. would like to make the Town Council aware of a traffic situation that has persisted inspite of speed humps installed recently to calm the traffic on the above named street.

Many drivers coming from NC54 maintain a speed that is much above the posted 25mph till they hit the speed hump at 1110 Burning Tree Dr. These drivers don't slow down enough, and the front end of the car will hit the pavement with such impact as to leave a scar on it. Drivers going toward NC54 very often accelerate above 25mph so they can make up for lost time going over previous speed humps.

Therefore, the residents of the last stretch of Burning Tree Dr. would like to recommend that the Town Council authorize the installation of one more speed hump at approximately 1131 Burning Tree Drive. This, we feel, would conclude the traffic calming process and avoid possible accidents, especially in the summer months when children play outdoors.

We look forward to your reply.
