Mayor

Sept 23, 1921

The Board of Aldermen at 7:30 P.M. Mayor Roberson presiding. All Members of the Board present except Ald. R.P. Andrews,

On Motion of R.P. Andrews, the Bus Cap was directed to sign Contract with United States Rubber Co. for 1000 feet of Dragon Fire Hose, at $1.30, payable in one and two years, with 6% interest,

On Motion of R.P. Andrews the following electrical regulations were adopted:

July 18th 1921

Mayor Roberson
Chapel Hill, N.C.

Dear Mr. Roberson:-

Referring to the action of the City Council in appointing me Electrical Inspector for Chapel hill you ll recall that at that time I suggested that there would be certain rules of the National Code that would have to be interpreted by mend applied to our local conditions. In order to make it possible for to hold all of the men doing wiring in Chapel Hill to the same stand I have been told by the State Inspector that it will be necessar for me to get the Board of Aldermen to pass as local rules any of wh there might be any question raised by the said wiremen as being tricter that called for by the National Code. I am, therefore, asking at the following be brought up for discussion and if they meet wh your approval, they be made part og our local laws, and as such copy be sent to each of the men wiring in Chapel Hill.

I have been able to get some of the en to acceed to my requests on these matters, while others are n so disposed.

1. Entrance Switches must not be more han six feet from the floor.
2. Taped joints must have two full couses of rubber tape, half lapped, and two full courses of friction tape, half lapped.
3. In making branches, taps, cut-ins etc, a knob must be placed within two inches of the joint.
4. When one wire crosses another, the cossing must be protected by having a tube on one wire, this tbe to be held in place directly under the other wire by tw knobs, one at each end of the tube.
5. Unless using a socket be which has a strain bushing approves by the Local Electrical Inspector, knots must be tied in all sockets. Knots must be always tied in roseattes.
6. A suitable meter board must be used on all walls, these boards to be installed by the wiremen.
7. Entrance switches to be put on the left hand side of the meter outlet.

If any discussion is desired on the above suggestions I will be glad to come before the Board and explain the reasons behind this request.

Yours very respectfully

John E Lear

The Board then adjourned
